Class Descriptions

Superstar Fitness This class offers your children plenty of opportunities to get exercise and strengthen their gross motor skills. Activities and games will also help improve coordination and physical agility.

Game Time What kid doesn't like to play games? From board games to t-ball, your children will have a variety of games to help them learn team building and good sportsmanship and just have some good old fashioned fun with their friends.

Mad About Science What do you think would happen if we ... Children need to experiment, need to become good problem solvers and have opportunities to build critical thinking skills, and of course, we'll be blowing stuff up!

Dramatic Play Let's pretend! Imaginative play has been proven to increase children's cognitive skills and help them do better in school. We'll play doctor's office, restaurant, act out nursery rhymes – take make believe to a whole new level.

Creative Cooking Take one scoop of encouragement, a heap of following directions, and a pinch of nutrition – mix it all together and you've got a group of happy kids with full bellies!

Yoga Stretch & Yoga Cool Down In these classes, teachers will assist their students in gaining balance, coordination and flexibility. We will also focus on breathing techniques, peaceful resolutions, and gratitude.

Homework Club Yes, you read it correctly – we will help your children with their homework. This is a great opportunity for children to learn great work habits from their peers and get some work done in a fun, supportive way – before they play!

Shooting StARTists & Meet the Artists In these non-traditional art classes, your children will explore famous works of art and become artists themselves as they create their own masterpieces in a safe environment free from judgement. These classes will foster a love of creativity, increase cultural awareness, and boost self-esteem.

Club Hub This scheduled time during our afternoon of enrichment will give children the opportunity to "gab" with their friend and build stronger social skills. This will strengthen our community as we talk about relevant topics and problems that kids face today as well as all work together to come up with different solutions.
